

# Cloud Services Online Backup

- Backup, Sync, Share, and Store
- Cloud Backup and Synchronization together in one convenient package
- Fully-Automated and Easy-To-Use
- Data Stays In Canada

**Backup your computers, sync your files, and share anytime, anywhere - all in one complete and secure package.**

Staples Online Backup combines the security and reliability of backup software with the synchronization, sharing and collaboration capabilities of a cloud storage solution.

For most people, their digital information is some of the most important assets that they own. That's why a robust data protection strategy, including data backup, is absolutely essential.

People also want a secure and convenient way to share files, photos and videos with family and friends, or to access their files anytime and anywhere from mobile devices.

That's why we created Staples Online Backup as one integrated experience to protect all of your files. Sync files between your PC, Mac or mobile devices, share files with friends and family, and access files from anywhere online. It's a complete solution for all of your data protection and cloud storage needs.

- Easy to install, easy to use, and runs transparently in the background
- Synchronize files across multiple locations and devices
- Files are backed up instantly, every time you save
- Automatic versioning of files for date-based recovery
- Data is protected with 2 layers of strong encryption
- Fast and efficient with no bandwidth limits and keeps you in control
- Manage multiple users from a single account
- Walk into any Staples store and get support from a real human being

**The ultimate solution for protecting, managing and sharing your data in the cloud.**
